

GREG L. GIST, D.D.S.

COSMETIC / RESTORATIVE DENTISTRY

Specialty | Comprehensive Restorative / Crown and Bridge Dentistry with an emphasis in Cosmetic Rehabilitations. All cases are accomplished with comfortable oral sedation, so we can be very efficient with our patient's busy schedules, as well as putting the most anxious patients at ease.

Important Qualities of Doctor-Patient Relationship | A patient should have the final say as to the level of care that they want to pursue. Decisions made by insurance companies tend to best serve insurance companies. Our practice has NO managed care philosophies in place. We are relationship driven. We know our patients by their name, not their insurance coverage.

Professional Memberships / Licenses | American Dental Association, Texas Dental Association, Fort Worth District Dental Society, American Academy of Cosmetic Dentistry, Christian Medical Dental Society and the Dental Organization for Conscious Sedation.

Why Choose Me | We don't offer patchwork dentistry. We offer a level of care that is infection free to support overall health. For 25 years, our practice had seen patients from all over the continental USA, as well as many foreign countries. Dr. Gist's experience and approach to overall systemic health, as it relates to restorative dentistry, is the difference that sets this practice apart.

Charitable Work, Honors or Awards | Started in 1984, Dr. Gist has his own charity program, *Give a Smile for Life*. His practice has restored hundreds of smiles at no charge to those in need. Dr. Gist has been named a *Top Doc* by *Fort Worth, Texas Magazine* and a *Best Dentist in America* by *Consumer Research Council*. Dr. Gist also received the *Quintessence Publishing Award* at Baylor College of Dentistry for outstanding clinical work in the field of Periodontics and Crown and Bridge Dentistry.

Mission | To deliver the best service and highest quality of dental care in the world, to patients that are looking for this level of care. To accomplish this in a fun environment, surrounded by the most talented and nurturing support staff in the world. In short, to be a blessing to every patient that God brings us.
